

Product Descriptions for Hair Care Regimen for Women

It is important to know and categorize the function of each product and the level of danger of each of the ingredients. In one of our blogs, we explain why we must be very careful with what we allow to cross our first barrier of defense, the skin. Thanks to Biotechnology we understand how proteins interact with other proteins and our DNA and RNA, how the cell replicates and regulates its functions and how if mutations occur due to chemical or physical reaction, we can develop allergies, inflammation, immunotoxicity and even cancer.

The following score system we have issued is granted by clinical trials made for most of our products with Dr. Zoe Draelos, papers from PubMed and EGW. Being the number 1 the safest and the 10 the worst for you.

The overall score for the kit is 1

The active ingredient for this kit is 

Conditioner With Exosomes for Women

<https://gliabeauty.com/conditioner-with-exosomes-for-women/>

- Nourishes and strengthens hair.
- Promotes healthy hair growth.
- Repairs damaged hair.
- Provides essential nutrients to hair shaft and follicles.
- Effective for thinning hair.

Overall score for the product:

Main Ingredient:

Component	Function	%
Mesenchymal Stem Cells Growth Factors and Exosomes from the umbilical cord	GF are proteins that regulate immune responses and reproductive functions of the cell. This active ingredient is not synthesized in a lab, it is extracted from placentas and cultured. It contains anti-inflammatory and regenerative properties. Exosomes are vesicles generated by stem cells that carry macromolecules and improve intercellular communications.	20% 

Home Use Instructions: Apply the conditioner after rinsing the hair with plenty of water. First apply it to the ends and then spread it towards the mid length. Massage lightly to help nutrients penetrate well into the hair. Let it act for a few minutes and rinse with plenty of water. Avoid hot/warm water in this step.

Other Ingredients: Double Distilled Water, Cetyl Alcohol, Quaternary Ammonium Compound for Hair, Cocamide MEA, Fragrance.

Component	Function	Score
Double Distilled Water	Solvent.	
Quaternary Ammonium Compound for Hair	Humectant	  
Cocamide MEA	They are used as thickening and foaming agents in cosmetics and hygiene related formulations. They do not kill or retard organisms, but help to make foams, which help to drag any dirt onto the surface and then rinse off.	  
Cetyl Alcohol	Amicable Preservative	
Fragrance	Fragrance was tested on the clinical trials. This product is recommended for sensitive skin.
