

Product Descriptions for Dry Skin Regimen

It is important to know and categorize the function of each product and the level of danger of each of the ingredients. In one of our blogs, we explain why we must be very careful with what we allow to cross our first barrier of defense, the skin. Thanks to Biotechnology we understand how proteins interact with other proteins and our DNA and RNA, How the cell replicates and regulates its functions and how if mutations occur due to chemical or physical reaction, we can develop allergies, inflammation, immunotoxicity and even cancer.

The following score system we have issued is granted by clinical trials made for most of our products with Dr. Zoe Draelos, papers from PubMed and EGW. Being the number 1 safest and the 10 the worst for you.

This kit is meant for skin byo types that trend to get wrinkles:

The overall score for the kit is 1 😊

The active ingredient for this kit is 🧬

Eye Lifting Gel

<https://gliabeauty.com/eye-lifting-gel/>

Product Name: Eye Lifting Effect Gel - 0.3oz / 10mL

Recommended ages: 30+

pH: 6.5

Mature and early aging skins

This is the second step after using the facial cleanser. Use it in the day and at night to moisturize your face and neck.

This is meant for the eyelids.

Description #1: A balanced synergy of Mesenchymal Cell Growth Factors and exosomes, which nourish and hydrate the skin, visibly reducing the appearance of fine lines and wrinkles in the periorbital area.

- Reduces dark circles and under-eye puffiness.
- Minimization of fine lines and wrinkles around the eyes
- Improves skin elasticity around the eye area.
- Firming and moisturizing effect on the skin
- Makes the skin feel firm, tight and lifted.
- Enhanced hydration

Main Assets:

| Component | Function | % |
|---|---|---|
| Mesenchymal Stem Cells Growth Factors and Exosomes | They act as signaling molecules that stimulate cell proliferation and differentiation. This is important for tissue regeneration These are extracted from placentas and umbilical cords from healthy newborn donors and cultured in federal approved labs. | 20%  |
| Collagen | Protein - structure of body's skin, muscles, bones, and other connective tissues. If you downregulate, signs of aging will appear. Male | 1%  |

| | | |
|---------------------------------------|---|---|
| | usually have better reserves at mid age than women. | |
| Elastin | Protein - structural protein that allows your tissues to stretch out and stick back. | 1%  |
| Planktonic Exopolysaccharide 3 | Hydrophilic biocompatible polymer that showed in recent research anti-inflammatory, antioxidant, anti-cancer, antibacterial, and immune-modulating and prebiotic properties. | 1%  |

Extra Ingredients:

| Component | Function | Score |
|-------------------------------|--|---|
| Double Distilled Water | Solvent. |  |
| Pentylene Glycol | Humectants that bind with water. |  |
