

## **Product Descriptions for Oily Skin Regimen**

It is important to know and categorize the function of each product and the level of danger of each of the ingredients. In one of our blogs, we explain why we must be very careful with what we allow to cross our first barrier of defense, the skin. Thanks to Biotechnology we understand how proteins interact with other proteins and our DNA and RNA, How the cell replicates and regulates its functions and how if mutations occur due to chemical or physical reaction, we can develop allergies, inflammation, immunotoxicity and even cancer.

The following score system we have issued is granted by clinical trials made for most of our products with Dr. Zoe Draelos, papers from PubMed and EGW. Being the number 1 the safest and the 10 the worst for you.

This kit is meant for skin byo types that trend to get acne:

The overall score for the kit is 1 😊

The active ingredient for this kit is 🧬

**Product Name:** Eye Contour Gel - 0.3oz / 10mL

**Recommended ages:** Young people 14 to 30 years old

**pH:** 6.5

**For Oily Skin**

**This is the second step after using the facial cleanser.** Use it in the day and at night to hydrate your eyelids.

This is meant for the eyelids.

**Description #1:**

An ultralight, fresh and non-greasy cream that visibly reduces dark circles and puffiness to illuminate and relax the gaze. Suitable even for the most sensitive eyes.

- Prevents the formation of new fine lines and wrinkles.
- Provides deep hydration to the skin around the eyes.
- Fights the visible signs of fatigue.
- Helps to brighten the skin around the eyes.
- Helps to improve the overall texture and elasticity.

**Precautions/Caution:** External/Skin use only. Do not eat. Suspend use in case of reaction/allergy. Keep out of reach of children.

**Main Assets:**

Component	Function	%
<b>Mesenchymal Stem Cells Growth Factors and Exosomes from the umbilical cord</b>	<b>GF are proteins that regulate immune responses and reproductive functions of the cell. This active ingredient is not synthesized in a lab, it is extracted from placentas and cultured. It contains anti-inflammatory and regenerative properties.</b>	<b>20%</b> 

	<b>Exosomes are vesicles generated by stem cells that carry macromolecules and improve intercellular communications.</b>	
<b>Collagen</b>	<b>Protein - structure of body's skin, muscles, bones, and other connective tissues. If you downregulate, signs of aging will appear. Male usually have better reserves at mid age than women.</b>	<b>3%</b> 
<b>Elastin</b>	<b>Protein - structural protein that allows your tissues to stretch out and stick back.</b>	<b>2%</b> 
<b><i>Aloe barbadensis</i> (Aloe Vera) Leaf Extract</b>	<b>Linked to anti-inflammatory properties. Linked to skin regeneration.</b>	<b>10%</b> 
<b><i>Chamomilla recutita</i> (Matricaria) Flower Extract</b>	<b>Linked to anti-inflammatory properties and as a natural bactericide. Linked to skin regeneration.</b>	<b>10%</b> 
<b>Hyaluronic acid</b>	<b>This allows skin to stretch and flex, reducing age signs and fine lines. This is very important for mixed skin that tends to get oily at mid 30 years of age. Recommended for mixed skin types.</b>	<b>0.5%-1%</b> 

**Home Use Instructions:** Apply over the surface of the eye contour with circular movements until it has been completely absorbed. For nighttime use.

**Other Key Ingredients:**

Component	Function	Score
-----------	----------	-------

<b>Double Distilled Water</b>	<b>Solvent.</b>	
<b>Pentylene Glycol</b>	<b>Humectants that bind with water.</b>	
<b><i>Lactuca Sativa</i> (Lettuce) Leaf Extract</b>	<b>Natural antibacterial, this is used to prevent acne.</b>	
<b>Hydroxyacetophenone</b>	<b>Amicable Preservative</b>	
<b>Fragrance</b>	<b>Fragrance was tested in clinical trials. This product is recommended for sensitive skin.</b>
