

### Product Descriptions for Daily Skin Regimen

It is important to know and categorize the function of each product and the level of danger of each of the ingredients. In one of our blogs we explain why we must be very careful with what we allow to cross our first barrier of defense, the skin. Thanks to Biotechnology we understand how proteins interact with other proteins and our DNA and RNA, How the cell replicates and regulates its functions and how if mutations occur due to chemical or physical reaction, we can develop allergies, inflammation, immunotoxicity and even cancer.

The following score system we have issued is granted by clinical trials made for most of our products with Dr. Zoe Draelos, papers from PubMed and EGW. Being the number 1 the safest and the 10 the worst for you.

This kit is meant for skin of all biotypes:

The overall score for the kit is 1 😊

The active ingredient for this kit is 🧬

## Facial Cleanser

<https://gliabeauty.com/facial-cleanser/>

**Product Name: FACIAL CLEANSER - 4oz**

**Recommended ages: 20+**

**pH: 6.3**

**For all skin types**

**This is always the first step** to your daily skin care routine. Use it in the day and at night to wash your face. The rule exception is the Gold cream since you will wash your face before and after its usage.

This is meant for the face and neck.

**Description:** Innovative formula of Facial Dermo cleanser with Exosomes thoroughly cleans and prepares the skin for other skincare products such as serums and moisturizers. Does not contain sulfates and parabens.

- Safely removes makeup and impurities from your skin.
- Maintains the natural balance of pH on the skin.
- Helps to unclog pores.
- Improves the skin's overall appearance and texture.

Use it in the day and at night to wash your face. This is the first step to your daily skin care routine.

**Important Assets:**

Component	Function	%
Mesenchymal Stem Cells Growth Factors and Exosomes from the umbilical cord	<b>GF are proteins that regulate immune responses and reproductive functions of the cell. This active ingredient is not synthesized in a lab, it is extracted from placentas and cultured. It contains anti-inflammatory and regenerative properties.</b> <b>Exosomes are vesicles generated by stem cells that carry macromolecules and improve intercellular communications.</b>	<b>5%</b> 

<b>Lactic acid</b>	<b>Exfoliating alpha-hydroxy acid that clears dead skin cells from the skin pores. It regulates the pH and regulates the overproduction of oils.</b>	<b>0.45%</b> 
<b>Salicylic acid</b>	<b>Exfoliating acid that is associated with the treatment against acne, psoriasis, seborrheic dermatitis and dandruff.</b>	<b>0.45%</b> 

**Home Use Instructions:** Apply the facial foam on the wet neck and face with circular movements. Rinse with plenty of water. This formula is very amicable to sensitive skins and women who are expecting, and it is washable so, its only function is to wash off the skin and to regulate the pH for the application of the moisturizer (mixed skins), serum (dry skins) and creams (extremely dry skins).

**Additional Key Ingredients:**

<b>Component</b>	<b>Function</b>	<b>Score</b>
<b>Double Distilled Water</b>	<b>Solvent.</b>	
<b>Lauryl Glucoside</b>	<b>Glucoside with foam and skin conditioning properties.</b>	
<b>Disodium Cocoamphoacetate Ethoxylated Lanolin</b>	<b>Surfactant with emulsifying properties. This is amicable to our Mesenchymal stem cell derivatives.</b>	
<b>Pentylene Glycol</b>	<b>Humectants that bind with water.</b>	
<b>Hydroxyacetophenone</b>	<b>Amicable Preservative</b>	

<b>Mica</b>	<b>Is a silicate mineral that improves the consistency of the cosmetic.</b>	
<b>Fragrance</b>	<b>Fragrance was tested in the clinical trials. This product is recommended for sensitive skin.</b>
