

HAIR CARE FOR MEN KIT

It is important to know and categorize the function of each product and the level of danger of each of the ingredients. In one of our blogs, we explain why we must be very careful with what we allow to cross our first barrier of defense, the skin. Thanks to Biotechnology we understand how proteins interact with other proteins and our DNA and RNA, How the cell replicates and regulates its functions and how if mutations occur due to chemical or physical reaction, we can develop allergies, inflammation, immunotoxicity and even cancer.

The following score system we have issued is granted by clinical trials made for most of our products with Dr. Zoe Draelos, papers from PubMed and EGW. Being the number 1 the safest and the 10 the worst for you.

The [overall score](#) for the kit is 1. 2

The [active ingredient](#) for this kit is 

3 in 1 Shampoo/Conditioner and Body Wash With Exosomes for Men

Hair Vitamin

GF Elixir

<https://gliabeauty.com/shampoo-with-exosomes-for-men/>

Product Name: 3 in 1 Shampoo/Conditioner and Body Wash With Exosomes for Men

pH: 6.3

Description: Innovative formula with exosomes stimulates hair growth and improves hair quality.

- Deeply cleanses the scalp and body.
- Recommended for men that suffers of hair loss.
- The hair follicles and the scalp look stronger.
- Provides hair shine.
- Recommended for thinning hair.

Precautions/Caution: External/Skin use only. Do not eat. Suspend use in case of reaction/allergy. Keep out of reach of children.

Main Assets:

Component	Function	%
Mesenchymal Stem Cells Growth Factors and	GF are proteins that regulate immune responses and reproductive functions of the cell. This active ingredient is not synthesized in a lab, it is extracted from placentas and cultured. It contains anti-inflammatory and regenerative properties.	20% 

Exosomes from the umbilical cord	Exosomes are vesicles generated by stem cells that carry macromolecules and improve intercellular communications.	
---	--	--

Other Key Ingredients:

Component	Function	Score
Double Distilled Water	Solvent.	
Lauryl Glucoside	Glucoside with foam and skin conditioning properties.	
Pentylene Glycol	Humectants that bind with water.	
Cocamide MEA	They are used as thickening and foaming agents in cosmetics and hygiene related formulations. They do not kill or retard organisms, but help to make foams, which help to drag any dirt onto the surface and then rinse off.	
Hydroxyacetophenone	Amicable Preservative	
Fragrance	Fragrance was tested on the clinical trials. This product is recommended for sensitive skin.	

Home Use Instructions: Completely saturate your hair with warm, not hot, water. Squirt a small amount of the 3 in 1 into the rug of your hand and massage it into your scalp until it lathers. Work the shampoo through the entire length of your hair, but focus on the scalp. Rinse your hair and scalp completely.

Product Name: Hair vitamin

Recommended for: Fragile hair or those experiencing hair loss.

pH: 5.5

Description: Improves hair quality, making it stronger and healthier.

- Nourishes and hydrates.
- Repairs damaged hair.
- Recommended for thinning hair.
- Indicated for alopecia.
- Improves the appearance of the beard.

Precautions/Caution: External/Skin use only. Do not eat. Suspend use in case of reaction/allergy. Keep out of reach of children.

Main Assets:

Component	Function	%
Mesenchymal Stem Cells Growth Factors and Exosomes from the umbilical cord	GF are proteins that regulate immune responses and reproductive functions of the cell. This active ingredient is not synthesized in a lab, it is extracted from placentas and cultured. It contains anti-inflammatory and regenerative properties. Exosomes are vesicles generated by stem cells that carry macromolecules and improve intercellular communications.	20% 
Arginine	Amino Acid that protects the skin from free radical damage and allows skin reparation.	0.5%-1% 

Vitamin B5	Stimulates the root of the hair follicle. This restores some of the elasticity to the collagen that surrounds that area. Thus, it helps prevent hair loss and also helps control the effects of androgenic alopecia.	0.5%-1 % 
Sodium Lactate	Sodium lactate supports hair growth in a few ways. By increasing your scalp's moisture, sodium lactate can boost hair elasticity, which reduces breakage and brittleness.	0.5%-
Amino acids	Amino acids add strength, like any protein, to the strands of the same and thus manage to reduce their size allowing better withstand moisture. Aspartic Acid, Glycine, Alanine, Serine, Valine, Proline, Threonine, Isoleucine, Histidine, Phenylalanine.	1%-5% 

Other Key Ingredients:

Component	Function	Score
Double Distilled Water	Solvent.	
Cellulose	Anti-cracking agent for cosmetics used to improve viscosity.	
Sodium PCA	Is the sodium salt of pyrrolidone carboxylic acid that is an amino acid found in the skin barrier.	
Hydroxyacetophenone	Amicable Preservative	
Fragrance	Fragrance was tested on the clinical trials. This product is recommended for sensitive skin.	

Home Use Instructions: Apply the conditioner after rinsing the hair with plenty of water. First apply it to the ends and then spread it towards the mid length. Massage

lightly to help nutrients penetrate well into the hair. Let it act for a few minutes and rinse with plenty of water. Avoid hot/warm water in this step.

Product Name: GF Elixir Serum 10ml

Recommended ages: All ages

pH: 6.5

Main Assets:

Component	Function in nature	%
Mesenchymal Stem Cells Growth Factors and Exosomes from the umbilical cord	GF are proteins that regulate immune responses and reproductive functions of the cell. This active ingredient is not synthesized in a lab, it is extracted from placentas and cultured. It contains anti-inflammatory and regenerative properties. Exosomes are vesicles generated by stem cells that carry macromolecules and improve intercellular communications.	30% 

Other Key Ingredients:

Component	Function	Score
Ultra-Pure Water	Solvent.
