

HAIR CARE FOR WOMEN KIT

It is important to know and categorize the function of each product and the level of danger of each of the ingredients. In one of our blogs, we explain why we must be very careful with what we allow to cross our first barrier of defense, the skin. Thanks to Biotechnology we understand how proteins interact with other proteins and our DNA and RNA, How the cell replicates and regulates its functions and how if mutations occur due to chemical or physical reaction, we can develop allergies, inflammation, immunotoxicity and even cancer.

The following score system we have issued is granted by clinical trials made for most of our products with Dr. Zoe Draelos, papers from PubMed and EGW. Being the number 1 the safest and the 10 the worst for you.

The [overall score](#) for the kit is 1.3

The [active ingredient](#) for this kit is 

Shampoo With Exosomes for Women

Conditioner With Exosomes for Women

Hair Vitamin

GF Elixir

<https://gliabeauty.com/shampoo-with-exosomes-for-women/>

Product Name: Shampoo With Exosomes for Women

Recommended for: Fragile hair or those experiencing hair loss.

pH: 6.5

Description: Contains exosomes, which are ideal for hair growth and improve the overall health of the hair and scalp.

- Provides deep cleansing and nourishment.
- Promotes healthy hair growth.
- Reduces hair loss and thinning.
- Reduces hair breakage.
- Improves the overall texture and shine of the hair.

Precautions/Caution: External/Skin use only. Do not eat. Suspend use in case of reaction/allergy. Keep out of reach of children.

Home Use Instructions: Completely saturate your hair with warm, not hot, water. Squirt a small amount of shampoo into the palm of your hand and massage it into your scalp until it lathers. Work the shampoo through the entire length of your hair, but focus on the scalp. Rinse your hair and scalp completely.

Main Assets:

| Component | Function | % |
|---|---|---|
| Mesenchymal Stem Cells Growth Factors and Exosomes from the umbilical cord | GF are proteins that regulate immune responses and reproductive functions of the cell. This active ingredient is not synthesized in a lab, it is extracted from placentas and cultured. It contains anti-inflammatory and regenerative properties. Exosomes are vesicles generated by stem cells that carry macromolecules and improve intercellular communications. | 20%  |

Other Key Ingredients:

| Component | Function | Score |
|-------------------------------|---|---|
| Double Distilled Water | Solvent. |  |
| Lauryl Glucoside | Glucoside with foam and skin conditioning properties. |  |
| Cocamide MEA | They are used as thickening and foaming agents in cosmetics and hygiene related formulations. They do not kill or retard organisms, but help to make foams, which help to drag any dirt onto the surface and then rinse off. |    |
| Hydroxy-acetophenone | Amicable Preservative |  |
| Fragrance | Fragrance was tested on the clinical trials. This product is recommended for sensitive skin. | |

<https://gliabeauty.com/conditioner-with-exosomes-for-women/>

Product Name: Conditioner With Exosomes for Women 17 oz
Recommended for: Fragile hair or those experiencing hair loss.
pH: 5.5

Description: Repairs hair and combats aging from the root. For healthier, nourished, shiny and voluminous hair. For a more lush and thicker appearance.

- Nourishes and strengthens hair.
- Promotes healthy hair growth.
- Repairs damaged hair.
- Provides essential nutrients to hair shaft and follicles.
- Effective for thinning hair.

Precautions/Caution: External/Skin use only. Do not eat. Suspend use in case of reaction/allergy. Keep out of reach of children.

Home Use Instructions: Apply the conditioner after rinsing the hair with plenty of water. First apply it to the ends and then spread it towards the mid length. Massage lightly to help nutrients penetrate well into the hair. Let it act for a few minutes and rinse with plenty of water. Avoid hot/warm water in this step.

Main Assets:

| Component | Function | % |
|--|--|--|
| Mesenchymal Stem Cells Growth Factors and Exosomes from the umbilical cord | GF are proteins that regulate immune responses and reproductive functions of the cell. This active ingredient is not synthesized in a lab, it is extracted from placentas and cultured. It contains anti-inflammatory and regenerative properties. Exosomes are vesicles generated by stem cells that carry macromolecules and improve intercellular communications. | 20%  |

Other Key Ingredients:

| Component | Function | Score |
|--|---|---|
| Double Distilled Water | Solvent. |  |
| Quaternary Ammonium Compound for Hair | Humectant |   |
| Cocamide MEA | They are used as thickening and foaming agents in cosmetics and hygiene related formulations. They do not kill or retard organisms, but help to make foams, which help to drag any dirt onto the surface and then rinse off. |    |
| Cetyl Alcohol | Amicable Preservative |  |
| Fragrance | Fragrance was tested on the clinical trials. This product is recommended for sensitive skin. | |

Product Name: Hair vitamin

Recommended for: Fragile hair or those experiencing hair loss.

pH: 5.5

Description: Improves hair quality, making it stronger and healthier.

- Nourishes and hydrates.
- Repairs damaged hair.
- Recommended for thinning hair.
- Indicated for alopecia.
- Improves the appearance of the beard.

Precautions/Caution: External/Skin use only. Do not eat. Suspend use in case of reaction/allergy. Keep out of reach of children.

Home Use Instructions: Apply the conditioner after rinsing the hair with plenty of water. First apply it to the ends and then spread it towards the mid length. Massage lightly to help nutrients penetrate well into the hair. Let it act for a few minutes and rinse with plenty of water. Avoid hot/warm water in this step.

Main Assets:

| Component | Function | % |
|--|--|--|
| Mesenchymal Stem Cells Growth Factors and Exosomes from the umbilical cord | GF are proteins that regulate immune responses and reproductive functions of the cell. This active ingredient is not synthesized in a lab, it is extracted from placentas and cultured. It contains anti-inflammatory and regenerative properties. Exosomes are vesicles generated by stem cells that carry macromolecules and improve intercellular communications. | 20%  |
| Arginine | Amino Acid that protects the skin from free radical damage and allows skin repairation. | 0.5%-1%  |

| | | |
|-----------------------|---|--|
| Vitamin B5 | Stimulates the root of the hair follicle. This restores some of the elasticity to the collagen that surrounds that area. Thus, it helps prevent hair loss and also helps control the effects of androgenic alopecia. | 0.5%-1 %  |
| Sodium Lactate | Sodium lactate supports hair growth in a few ways. By increasing your scalp's moisture, sodium lactate can boost hair elasticity, which reduces breakage and brittleness. | 0.5%- |
| Amino acids | Amino acids add strength, like any protein, to the strands of the same and thus manage to reduce their size allowing better withstand moisture. Aspartic Acid, Glycine, Alanine, Serine, Valine, Proline, Threonine, Isoleucine, Histidine, Phenylalanine. | 1%-5%  |

Other Key Ingredients:

| Component | Function | Score |
|-------------------------------|---|---|
| Double Distilled Water | Solvent. |  |
| Cellulose | Anti-cracking agent for cosmetics used to improve viscosity. |  |
| Sodium PCA | Is the sodium salt of pyrrolidone carboxylic acid that is an amino acid found in the skin barrier. |  |
| Hydroxyacetophenone | Amicable Preservative |  |

| | |
|-----------|--|
| Fragrance | Fragrance was tested on the clinical trials. This product is recommended for sensitive skin. |
|-----------|--|

Product Name: GF Elixir Serum 10ml

Recommended ages: All ages

pH: 6.5

Home Use Instructions: Apply over the surface of the neck and face with circular movements until it has been completely absorbed. Preferably, apply serum cold and at night.

Main Assets:

| Component | Function in nature | % |
|--|--|--|
| Mesenchymal Stem Cells Growth Factors and Exosomes from the umbilical cord | GF are proteins that regulate immune responses and reproductive functions of the cell. This active ingredient is not synthesized in a lab, it is extracted from placentas and cultured. It contains anti-inflammatory and regenerative properties. Exosomes are vesicles generated by stem cells that carry macromolecules and improve intercellular communications. | 30%  |

Other Key Ingredients:

| Component | Function | Score |
|------------------------|--|---|
| Ultra-Pure Water | Solvent. |  |
| Hydroxyethyl Cellulose | Is mainly used to help improve the texture and feel of skincare and cosmetic products. |  |
| Hydroxyacetophenone | Amicable Preservative |  |

| | |
|------------------|---|
| Fragrance | Fragrance was tested on the clinical trials. This product is recommended for sensitive skin. |
