

Product Descriptions for Extremely Dry Skin Regimen

It is important to know and categorize the function of each product and the level of danger of each of the ingredients. In one of our blogs, we explain why we must be very careful with what we allow to cross our first barrier of defense, the skin. Thanks to Biotechnology we understand how proteins interact with other proteins and our DNA and RNA, how the cell replicates and regulates its functions and how if mutations occur due to chemical or physical reaction, we can develop allergies, inflammation, immunotoxicity and even cancer.

The following score system we have issued is granted by clinical trials made for most of our products with Dr. Zoe Draelos, papers from PubMed and EGW. Being the number 1 safest and the 10 the worst for you.

This kit is meant for skin byo types that trend to get wrinkles:

The overall score for the kit is 1 😊

The active ingredient for this kit is 🧬

Nourishing Cream

<https://gliabeauty.com/nourishing-night-cream/>

Product Name: Nourishing Cream 1.5 oz

Recommended ages: 45+

pH: 6.3

For severe dry skin

This is the second step after using the facial cleanser. Use it in the day and at night to hydrate your face and neck.

This is meant for the face and neck. For sensitive areas like the orbitals, please use the eye lifting.

Description: Youth boosting formula that reduces wrinkles and fine line visibility. Improves the sensation of tightness and lifting of the skin. Enriched with collagen and elastin.

- Provides deep hydration to the skin.
- Helps to improve skin texture.
- Reduces the appearance of fine lines and wrinkles.
- Helps to stimulate collagen production.
- Improves skin elasticity and firmness.
- Rejuvenates the skin by providing essential nutrients.

Main Assets:

| Component | Function in nature | % |
|---|---|---|
| Mesenchymal Stem Cells Growth Factors and Exosomes from the umbilical cord | GF are proteins that regulate immune responses and reproductive functions of the cell. This active ingredient is not synthesized in a lab, it is extracted from placentas and cultured. It contains anti-inflammatory and regenerative properties. Exosomes are vesicles generated by stem cells that carry macromolecules and improve intercellular communications. | 20%  |

| | | |
|---------------------------|---|---|
| Rose Hips Seed Oil | <p>Oil rich in antioxidants and vitamin A, C and E. Those avoid inflammation, cell degeneration. This is a barrier that prevents infections and reduction of MMP-1, a protein that catalyze collagen.</p> <p>Vitamin A reduces fine lines and acne. Vitamin C is linked to reduce the chance to get skin cancer.</p> | <p>3%</p>  |
| Vitamin E | <p>Lipophilic vitamin that reduces inflammation and makes your skin tighter and fuller, helping to reduce the visibility of your lines.</p> | <p>1%</p>  |

Home Use Instructions: Apply over the surface of the neck and face with circular movements until it has been completely absorbed. For nighttime use.
