

Product Descriptions for Hair Care Regimen for Men

It is important to know and categorize the function of each product and the level of danger of each of the ingredients. In one of our blogs, we explain why we must be very careful with what we allow to cross our first barrier of defense, the skin. Thanks to Biotechnology we understand how proteins interact with other proteins and our DNA and RNA, how the cell replicates and regulates its functions and how if mutations occur due to chemical or physical reaction, we can develop allergies, inflammation, immunotoxicity and even cancer.

The following score system we have issued is granted by clinical trials made for most of our products with Dr. Zoe Draelos, papers from PubMed and EGW. Being the number 1 the safest and the 10 the worst for you.

The [overall score](#) for the kit is 1

The [active ingredient](#) for this kit is 

3 in 1 Shampoo/Conditioner and Body Wash With Exosomes for Men

<https://gliabeauty.com/shampoo-with-exosomes-for-men/>

pH: 6.3

This is always the first step in your daily hair care. Remember to massage for about 5-10 min focusing on the root.

This is meant for hair.

Description #1: Innovative formula with exosomes stimulates hair growth and improves hair quality.

- Deeply cleanses the scalp and body.
- Recommended for men that suffers of hair loss.
- The hair follicles and the scalp look stronger.
- Provides hair shine.
- Recommended for thinning hair.

Precautions/Caution: External/Skin use only. Do not eat. Suspend use in case of reaction/allergy. Keep out of reach of children.

Main Asset: Exosomes are the most novel treatment associated with hair growth!

Component	Function	%
Mesenchymal Stem Cells Growth Factors and Exosomes from the umbilical cord	GF are proteins that regulate immune responses and reproductive functions of the cell. This active ingredient is not synthesized in a lab, it is extracted from placentas and cultured. It contains anti-inflammatory and regenerative properties. Exosomes are vesicles generated by stem cells that carry macromolecules and improve intercellular communications.	20% 

Home Use Instructions: Completely saturate your hair with warm, not hot, water. Squirt a small amount of the 3 in 1 into the rug of your hand and massage it into your scalp until it lathers. Work the shampoo through the entire length of your hair, but focus on the scalp. Rinse your hair and scalp completely.

Component	Function	Score
Double Distilled Water	Solvent.	
Lauryl Glucoside	Glucoside with foam and skin conditioning properties.	
Coco Betaine	Betaine helps to improve the appearance of hair when integrated with other active ingredients in conditioners and masks: it leaves hair softer, shinier and fuller, reduces static electricity, retains moisture and protects hair from external aggressions.	
Glycerin	Moisturizer	
Pentylene Glycol	Humectants that bind with water.	
Cocamide MEA	They are used as thickening and foaming agents in cosmetics and hygiene related formulations. They do not kill or retard organisms, but help to make foams, which help to drag any dirt onto the surface and then rinse off.	
Hydroxy-acetophenone	Amicable Preservative	

Fragrance

Fragrance was tested on the clinical trials. This product is recommended for sensitive skin.
